Day-Care-Enrollment:

Big steps

Building bridges to

for little feet

early education

LRA RV - 01 - Stand: 07/2019

Goals

The federal program “Day-Care-Enrollment: **Building bridges to early education**” develops offers for the county of Ravensburg to prepare and enable children to enter the German system of early childhood education.

Together we want to promote equal access to early education for all children, regardless of their background, financial resources or nationality. Via different educational offers, additional information or counselling we want to make early education available for every child. Thus, social integration, participation of families and every child’s right to education, respect and appreciation shall be achieved.

Additionally, the program wants to support professionals in day-care centres or any other person involved in dealing with diversity.

Realization

The county of Ravensburg created a network and coordination office seated in the youth welfare office of Ravensburg. This network connects all four of our specialists of the towns **Isny, Wangen, Bad Waldsee and Ravensburg**. Our specialists are located in four “Anchor- Facilities for children” in which the programs for families are developed and realized. In order to further connect with the social areas of the four cities, we cooperate with families, children, professionals working in day care centres and others involved.

Cooperation includes:

- ✓ Child care facilities within the four towns Isny, Bad Waldsee, Wangen and Ravensburg
- ✓ Refugee Relief
- ✓ Parent-child programs and multigenerational houses
- ✓ Youth welfare service
- ✓ Schools
- ✓ Doctors and Midwives

Offers

Our offers include:

- ✓ **Providing information** about the German system of child care, for example via parent-teacher conferences, open consultation hours, events in refugee accommodations or family meeting places.
- ✓ **Offering early childhood education** in form of play groups, parent-child groups, family support, reading circles for children and parents.
- ✓ **Providing further training** for pedagogical professionals and others through workshops and trainings, counselling, training for native language speakers or those working in family support programs.
- ✓ **Networking** in the form of work groups, committees and round tables.
